

PROJECT SERVICES WIND FARM APPLICATIONS

ONE-STOP PACKAGING SOLUTION

Within the design build process, we manage materials packaging—from developing a bill of material right through to job site delivery—for the collection system, substation and transmission lines. We combine utilities engineering capabilities with the most comprehensive supply chain management expertise in the industry to deliver a one-stop packaging solution that ideally fits deadline-driven project environments of wind farms.

For more information about how HD Supply Utilities can deliver expert materials management to accelerate project-driven deadlines and improve bottom line profitability, call 888.679.8679.
