FOR IMMEDIATE RELEASE

HD Supply Power Solutions Expands in Oklahoma and Virginia

ATLANTA – July 30, 2013 – HD Supply Power Solutions, a leading provider of an extensive and dynamic portfolio of products, services and solutions for Public Power, Investor-Owned Utilities, Construction and Industrial customers, today announced the addition of a new location in Oklahoma, and an expansion of a Virginia facility. The new Oklahoma location is in Marietta, a town near the Texas border, while the Virginia expansion is in the capital city of Richmond.

These two additions further extend the presence of HD Supply Power Solutions in key geographic regions. In May, HD Supply Power Solutions announced they had extended their ability to serve customers by adding sales and service capacity in Durham, N.C., Midland, Texas, and Salt Lake City, Utah.

“We are committed to strategic growth that enables us to better serve our customers and build value,” said Steve Margolius, President, HD Supply Power Solutions. “Expanding our product reach and creating new offerings, as well as increasing our national footprint in important geographic regions, allows us to better partner with our customers to provide them with the products and services they need to be successful.”

For more information the new facilities, customers are encouraged to visit the locations, email: powersolutions@hdsupply.com, call (toll-free) 855-615-8372, or go to <http://hdsupplypowersolutions.com>
