FOR IMMEDIATE RELEASE

**HD SUPPLY FACILITIES MAINTENANCE RELEASES NEW
COMMERCIAL PRODUCT LINE CATALOG**

SAN DIEGO, CALIF. – July 6, 2009 - HD Supply Facilities Maintenance, a leading supplier of Maintenance, Repair and Operating (MRO) products to the multifamily housing, hospitality, and healthcare industries, has released its new Commercial Product Line Catalog, a 224-page catalog with more than 3,000 products for use in mid and high-rise buildings.

“Commercial product expansion is one of our key initiatives for 2009,” said Robin Soehl, vice president, Marketing and Business Development, HD Supply Facilities Maintenance. “During these challenging economic times, our customers are looking to reduce the number of suppliers they do business with to streamline their purchasing process. The stocking of these products enhances our “one-stop shop” value proposition.”

The product expansion and new catalog was created to better serve the unique needs of customers with mid and high-rise buildings (four stories or more) as well as customers with a need for commercial grade products. The catalog features an expanded assortment of Plumbing, Heating, Ventilation & Air Conditioning (HVAC) and Electrical products.

“We have expanded these product category lines significantly,” said John Berry, vice president, Merchandising and Sourcing, HD Supply Facilities Maintenance. “The products will be stocked in our distribution centers, available for same day shipping, and round out our assortment to better serve maintenance professionals in the multifamily, hospitality and healthcare industries.”

The HD Supply Facilities Maintenance Commercial Product Line Supplement was mailed to customers and distributed by the field and national account sales teams. The products will also be available on line at www.hdsupplysolutions.com .
